

LET PROMAT HELP YOU MEET YOUR PRODUCTIVITY GOALS

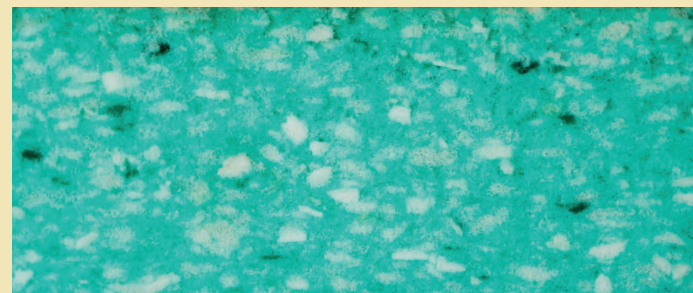

WHAT IS THE RIGHT SOLUTION FOR YOU?

It's a fact, a more comfortable cow is a more productive cow. And nobody offers cow comfort solutions like Promat. For the past 25 years dairy farmers in over 50 countries have partnered with Promat to increase cow productivity and farm profitability by using Promat's products. We are now excited to offer DCC Waterbeds by Promat.

POLY PILLOW

Recommended with all our free stall systems to help position the cow and maintain a clean and dry stall.

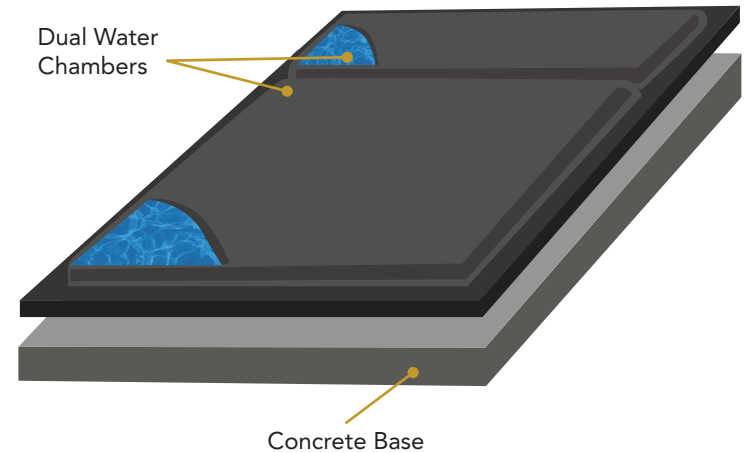

PROMAT HIGH DENSITY FOAM

Available in polyurethane or latex blend enclosed in plastic moisture barrier.

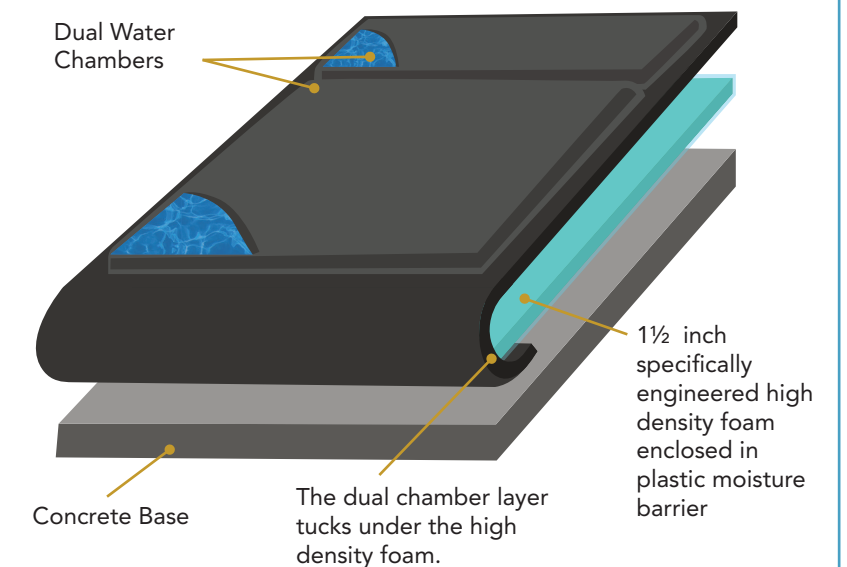

1 DCC ISO XC WATERBEDS

- DCC ISO Waterbeds, with two independent chambers, have been providing comfort to cows around the world since 2003.
- An upgrade to the third generation ISO design to now provide extra comfort (XC) by expanding the water chambers. By expanding the water flotation surface area of the bed the XC provides even more comfort for cows when in the lying position.
- Front and rear chambers are filled separately
- Larger water chambers will offer an even more comfort area for the cow's knees and her body.

2 DCC WAVE WATERBEDS

- Dual chamber Waterbed with a high-quality foam base to provide your cows with superior comfort and traction in the stall.
- Front and rear chambers are filled separately
- High density memory foam enclosed in a protective plastic moisture barrier.
- Designed to control the movement of water by providing a front and back chamber.
 - The front chamber for cows knees.
 - larger rear chamber for the cows body.
